Subject: Tariff increase

It looks like you are just looking at an increase in tariff 1, we the owners of are taxi will have to pay a fee for this how much that is now I'm not sure plus lost time and travel to get it changed unless the meter man comes to your premises like they did when I was with North Dorset, the soiled charge was already £20 behind North Dorset so the increase to £80 sounds fine, I'm aware some drivers don't use there meter as many times a customer will try to say it's £3 that's what
???? Charges me, a taxi meter should be used at all times when hired if we want we can charge less but not more, but with the meter on the customer can see what it should be, but my view is if we are getting an increase do it for all tariffs not just one
